The technical side of operating a website for your online business can be daunting even for experienced webmasters. Besides the marketing aspect of your online business, there are many other issues to think about, like stolen commissions, theft of your ebooks or software, spambots, broken links, protecting your forms from hacking attacks and so many more. Fortunately there are quite a few software tools available on the Internet to help you address these issues.

The following free tools will help you to avoid problems with your website and will save you time and relieve some of the frustrations encountered in running an online business. These high quality solutions are the result of over \$20,000 worth of professional software development and you can use them absolutely Free!

We will take a look at each tool individually and give you the opportunity to get your hands on them right now! For Free!

Frame Buster

When linking to your site, many web sites will show your web pages inside a frame. Frames can be used to place distracting headers on your site which reduce the impact and first impression visitors have of your site. It also encourages visitors to navigate away from your site losing a possible purchase.

Frame Buster will automatically protect every page on your entire web site by inserting a special script which will un-frame your pages automatically.

Mini Site Customizer

A truly invaluable tool is creating single page mini sites for other people to customize and use. Your mini site may be to promote one of your products intended for use by affiliates or for a resale rights product. All of your mini sites require customizing with the persons affiliate or payment links, their name, email address and so on. This customization is often difficult as details are scattered throughout the HTML page.

Mini Site Customizer is a simple tool which will automatically scan an HTML page for special "customization tags". It then presents a simple form to allow the mini site to be customized easily in seconds by affiliates or whomever. By distributing Mini Site Customizer along with your mini site, you'll make it quick and easy for others to use your mini site increasing its appeal.

Thank You Page Maker

If you are selling downloadable software or ebooks, you will have the need to create a Thank You or download page from which customers can download your product after paying. Thank You Page Maker provides a very quick and easy way of creating basic thank you pages. Simply select the file names of your software or ebooks and the software will build the page automatically.

It will automatically include complete instructions for zip files or pdf files and will automatically include special code to ensure that the page is not made visible to search engines. In a matter of seconds you will create ready to use, complete and attractive thank you pages.

Spambot Guardian

Most webmasters include their email address on the web site, so visitors can contact them. These are usually in the form of "mailto" links, allowing visitors to click on the link to send an email. Unfortunately spammers are also on the look out for these email addresses and they will use them as targets for spam.

Spammers use special web robots called Spambots which search continually through millions of web pages, looking for email links. When a Spambot finds an email link, the email address is added to a database, to be used for spamming by the owner and/or to be sold to other spammers.

Spambot Guardian will instantly protect your entire web site from Spambots. Before you upload your pages, Spambot Guardian will scan all your web pages on your PC and then it will encrypt any mailto links automatically, leaving them unreadable and unusable by Spambots but still fully usable by your visitors. The short time you spend using this simple tool will save you a lot of frustration dealing with spam in the future.

Child's Play FTP

New webmasters really struggle with the technical nature of most FTP programs. By automating most of the process and removing all the technical complexity, Child's Play FTP is a brand new approach to FTP. Many experienced webmasters are also now using this software as a simple automated alternative to the more conventional FTP programs.

It can automatically upload your entire web site from your PC onto your web host and when you add, delete or change any files, Child's Play FTP will make the same changes to your web host. By using this simple automated tool, you can avoid having to deal with complex technical issues and you will save considerable time and effort.

Affiliate Diamond

With Affiliate Diamond you will find a quick and easy fix for one of the biggest and most costly problems facing affiliate marketers. The problem arises when instead of simply clicking on your affiliate link, a customer copies the link into the address field at the top of their browser and modifies the link before using it.

This modification comes in two forms - chopped links and stolen commissions. In both these cases, you lose a commission that should rightfully be yours. You can avoid this problem and substantially boost your affiliate commission checks by using Affiliate Diamond.

Download Page Protector

The problem of theft is well known among sellers of ebooks and software. Some people will try to gain access to your product download or thank you pages in order to steal your ebooks or software. People will try to guess the name of your download page. You probably already reduce this risk by giving your download page a name that is hard to guess.

However some will use special hacking software that tries millions of permutations to guess the name of your download page. The fact is that simply giving your download page an unusual name is no longer an effective way of stopping those thieves determined to steal your products.

Download Page Protector quickly and easily protects you from this problem by automatically adding special code into your download page. This requires a security code to be included in the link for the download page, making it much harder for someone to steal your products.

Weblink Checker

It is all too easy to accidentally create a broken link when you are creating or updating your web site. A broken link can potentially lose you visitors and sales and it can even have an effect on your search engine ranking as well.

Weblink Checker is a very simple tool that will check your website for broken internal links within your site. It will check your site while still on your PC before you upload it to your web host. The software will instantly spider your entire site while on your PC. It will check every internal link and giving you a detailed report, so you can easily fix any problems with broken internal links.

Easy Resell Plus

If you run an ebook reselling business, you add new products regularly and set-up a mini sales site for each one. Easy Resell Plus is an easy to use software tool which will automate getting all of your mini sites set up with your payment details. Besides saving you time and effort, Easy Resell Plus will help you avoid mistakes which could cost you valuable sales.

Affiliate Customizer

Affiliate program owners create ready made advertisements for their affiliates allowing them to make sales with minimal effort. Affiliate Customizer is a simple tool which will customize your affiliate advertisements in seconds.

Helping your affiliates in this way can make a big difference in more affiliates that actively promote your products. Your affiliates simply fill in a short form with their details and the software will automatically customize your adverts for them, ready for use.

Form Protector

Depending on the purpose of the forms on your site, they are vulnerable to a wide variety of attacks. Your competitors, visitors and spammers can read the HTML of your forms simply by viewing the source of your pages and then use the information to cheat you, spam you or just flat take advantage of you. Automatically encrypting your forms with Form Protector will help protect your site from these varied types of attacks.
